

I would like to take this opportunity to say that KLove is my saving grace each and every day. I have it on all day long and it continually gives me encouragement to get through my day. I think if it were to be removed, I would no longer listen to radio and many of my friends would not either. Most of us only listen to this station because other programs are offensive with the music they play and the dj's comments about social issues. I believe KLove is in the best interest of the community. If it is found offensive by some people, they need to do what I do when I hear a radio program on another station that offends me--turn the channel!! This is my only radio station. There are millions of secular radio stations out there for non-believers or for those offended by Christianity. Please let us continue to have the few radio stations that we do have.
